### SOFTWARE ENGINEERING EXPERIENCE

**Software Architect** 2019 —  
**Senior Software Engineer (R&D)** 2018 — 2019  
Dolphin Interconnect Solutions

Contributed to the SmartIO solution for efficient resource sharing and high-performance, distributed I/O in PCIe shared-memory clusters. Gained experience with PCIe, non-transparent bridging, cluster interconnects, RDMA, distributed shared-memory architectures, NVMe, GPU programming, driver development and Linux kernel hacking.

- Contributed to the design, implementation and evaluation of SmartIO.
- Developed a storage framework based on SmartIO and GPUDirect, providing zero-copy raw block access to NVMe's from multiple GPUs in the cluster without involving CPU in the data path.
- Created a distributed device driver for simultaneous sharing of a non-SR-IOV NVMe among multiple hosts in a cluster.
- Implemented Linux KVM hypervisor support using VFIO mediated device drivers for assigning remote physical devices to VMs (pass-through).
- Developed various shared-memory cluster benchmarking tools.

**Software Developer** 2014 — 2015  
Bridgetech

Worked with online analysis of digital video over network. Got experience with video encoding, PIM-SM multicasting, MPEG streams, working with C++ in an embedded environment, and real-time network traffic analysis.

- Contributed to an MPEG transport stream parser for the VB288 content extractor using libpcap for live capturing IPTV (MPEG-DASH).
- Implemented a parser for MPEG-2 and MPEG-4/AVC video streams in order to extract and validate CEA608/708 closed captioning data and provide real-time event notifications.

**Software Development Engineer (Web Back-end)** 2013 — 2014  
Fotoware

Worked mainly with FotoWeb, a web-based image and video archiving system with full-text metadata search and workflows based on metadata tags. Designed REST services from the ground up, and worked with C++ (FastCGI) and Python (Flask). Also gained some experience with MongoDB and front-end technologies (JavaScript, HTML/CSS, jQuery).

- Implemented a hierarchical metadata taxonomy tree that supported CRUD operations and assignment to assets of tens of thousands of metadata tags within milliseconds.
- Created a configurable workflow engine allowing users to create custom pipelines and workloads for processing assets based on metadata tags.
- Made a background job scheduler with support for webhooks and asynchronous message-passing as well as bulk file operations.
- Implemented both back-end and front-end for exporting assets to an external CMS and an access management UI for these exports.

### EDUCATION

**PhD, Informatics** 2015 — 2022  
University of Oslo  
& Simula Research Laboratory  
Doctoral degree in computer science.

**MSc, Informatics** 2010 — 2014  
University of Oslo  
& Simula Research Laboratory  
Master's degree in computer science.

**BSc, Informatics** 2006 — 2010  
University of Oslo  
Bachelor's degree in computer science.

### OTHER JOB EXPERIENCE

**Front-end Web Developer** 2011 — 2013  
Fotoware

**Java Programmer** 2010 — 2011  
Redimi

**Teaching Assistant** 2009 — 2011  
University of Oslo

### SKILLS

**Software engineering** – C, Python, C++, CUDA, JavaScript, Bash, git, CI/CD, PHP, Java.

**System architecture** – Linux kernel hacking, PCIe device drivers, microcontrollers, embedded systems, virtual machines, memory and resource virtualization, Linux KVM/VFIO, memory architectures, NVMe, GPUDirect.

**Cluster computing & HPC** – distributed shared-memory applications, RDMA, GPU programming (CUDA), interconnection networks, ultra low-latency networking.

**TCP/IP & network programming** – transport layer protocols, TCP, routing protocols, multicasting, QoS & AQM, traffic engineering & analysis, libpcap, HTTP, REST API design, low-level network programming.
